

Stay hydrated, stay safe

Hands-free dispense

The solution that keeps you safely hydrated

We realize more than ever that protecting your customers is paramount. That's why we've produced a contact-less solution to help you achieve heightened safety from infection in the workplace.

Simply fit to your existing Waterlogic dispenser to provide contact-less access to the same clean, great-tasting water you and your customers always enjoyed.

There is no need to touch buttons or dials, meaning less opportunity for germs to spread between users.

Hands-free dispensing, combined with social distancing measures and the powerful combination of UV sanitization and BioCote® antimicrobial protection

ensures your customers are as safely

- Simple retro fit by your qualified technicians to your current dispensers in the field as well as new placement opportunities
- Intuitive no-hands functionality
- Easy to use, press and hold foot pedal to dispense water
- Easy to install

Better water, better thinking,
better for you, better for the planet

Simple to use

A pedal for each water type (cold and hot water).
Available for WL100, WL250 and WL350 models.

*For safety measures, the hot water dispense will have a 3 second delay.

Pricing:

- **Room Temp and Cold – Single Foot Pedal - \$ 7.95 per Month**
- **Hot and Cold – Dual Foot Pedals - \$9.95 per Month**
